

Thanksgiving 90 in the sun
Need any more proof the
ozone is gone no pollution up
there blocking the sun, who
says we need to clean up the
air, we'll fry if we do!

Tree fall down go boom with some help They said i was crazy wanting it cut but it was rotten in the core top to bottom I might be crazy I'm not stupid Very ungreen very practical provided heat for the loggers house all winter to boot

That strip of concrete to the left is the footing, i rodded some conc around the rocks the house sat on when my folks moved up there, stopped the squirrels at least

A box grows in brooklyn, north. Looks a crap load better too, will eventually fill with insulation, and cover the walk with foam sheet and pavers creating a euro style insulated apron to keep the cold and drafts away from the house. Technique also used by US military, who says the military are hide bound traditionalists, they adapt, to budget cuts that is.

well almost after, it's got a top, which will double as a seat and raised planter for mom. i never do anything that dosen't do something else or two or three, can't afford to pay for stuff with just one reason for existance.
